Process Book

Karina Gullen

Description

I started by following the instructions given to us in class. I did not know what kind of news to look into so I searched things that interested me. My first search was Cats, and a landed on a cite that discussed the friendship between cats and dogs. I choose the paragraph that had the most interesting words. From there I looked into the news of astrology. I found out that the moon in march is a Pisces which basically means we will all be in our feels this month. Again I choose a paragraph with words I found the most intriguing. Finally the last article I choose was something to do with art. I found an article about a pop up exhibition in Miam held by two Ukrainian artist. I choose a portion of the article where the artist spoke about the timing of their exhibition. I then shuffled the words in the spreadsheet about 5 times before it settled into a sequence that I found rather interesting.

"Ethereal Like the Small

Creative, century"

Ethereal Page

For this page I began by searching for Images related to the word ethereal.For me the moon and gems are ethereal.I included the crystal amethyst because It is one crystal that I find is out of this world. While searching for images I found an beautiful eye that embodies space and flowers as well as the human essence via the eye. I included that image as the center focus. Later on I added the word ethereal to the mid center to link the other pages and to follow the sentence.

Like The

For this page I wanted to continue the theme of Ethereal so I placed a giant moon which again is something that I find ethereal. The background is a beautiful image of cliffs and mountains. Reminds me of my time in Mexico, one could see the stars and moon best, surrounded by the silhouettes of the mountains. Finally I added a sculpture of women holding hands. Women create and bring life into this world, that alone is something I find out of this world and ethereal. I also like how strong and tall the women stand.

Small

For this page I unwanted to focus on small items. Butterflies are small so I included them in the page. The image of the small moon in the palm of someone's hand is something I found interesting and perfect for the page and for the topic. I wanted to emphasize the word small in another way other than through text. I selected the letters through different images and aligned them together. The background is one that I found suited the theme and also the overall composition for this page. I upped the brightness and saturation for the image as well to intensify the colors.

Creative

For this page I didn't really know where to start. I wanted to express creativity and used some photos I had already saved. The idea of a fish in space and using a painted canvas as water seemed pretty creative to me. I choose a moon heart in the background to go with the theme. Finally I wanted the page to look as if someone drew it which is why there is a sketched hand in the corner.

Century

I wanted this page to incorporate time but still be on par with the theme. I achieved this by layering images and changing the opacity. I used an image that looked outdated, an image of old london and changed it to balck and white. The background displays earth and its atmosphere. Above that is a series of clocks with the opacity at a different level. Finally I added a simple scenery/ silhouette of the moon and a person. This final page I find is quite relaxing.

Artistic Statement

This is a net art created using html. The web pages are based on the sentence "Ethereal Like the Small creative century" This sentence was created using a randomizing method sourcing words from articles and a generator to determine the words and in what order they would read. Once the sentence topic was developed I created a page for every word. I linked all pages using the words in the sentence as they appear in the page. All pages have a common theme of what I view as ethereal such as the moon.
